SKILLS

Human Subject Testing

User Interface Design

Digital Signal Processing

Bare-Metal Programming

Adaptive Control and Machine Learning

Numerical Simulation and Path Planning

EDUCATION

Ph.D.,
In Mechanical Engineering
Virginia Tech, *Blacksburg*, VA
Sept 2021

Dissertation: Joint Torque Feedback for Motion Training with an Elbow Exoskeleton

B.S., *cum laude*,
In Mechanical Engineering
NYU Tandon, *Brooklyn*, NY
May 2015

SUMMARY

A haptic researcher with specialties in human experiments, mechatronics, and control theory. Seeks to join a research/engineering team with a project-driven environment to improve human and robot perception. Competent in:

- **Designing and executing human subject research** with analytical tools resulting in 2 journal articles.
- **Developing concepts into prototypes** with manufacturing and programming skills resulting in an open-sourced publication.
- **Solving problems in frequency-domain** with modeling and simulation skills contributing 1 peer-reviewed journal and 4 co-authored papers.

RESEARCH INTERESTS

• Haptic Interfaces   • Physical Human-Robot Interactions   • Wearables

AREAS OF EXPERTISE

Human-centered Research
Gained as a Ph.D. Researcher | *Assistive Robotics Laboratory at* Virginia Tech

- Managed quantitative human subject studies to discover human perceptual threshold when wearing an exoskeleton, as described in a paper in Scientific Reports.
- Oversaw design iterations of the adaptive User Interface to measure kinesthetic perception resulted in the 2020 ICRA conference presentation.
- Analyzed the user data resulting in discovering active human elbow stiffness as evidenced by a journal paper in IEEE Access.

Mechatronic Product Development
Gained as a Ph.D. Researcher | *Assistive Robotics Laboratory at* Virginia Tech

- Led Arm Haptic Feedback Team with rapid prototyping and embedded programming as evidenced by an open-source paper, HardwareX.
- Collaborated with a Motor Expert to solve a Brushless DC motor's Initial Pose Detection problem as exhibited in the HardwareX.
- Mentored two professionals and advised 2 Senior Design teams, including a team that participated in the 2019 Cornell Cup Robotics.

Modeling and Simulation of Physical Human-robot Interaction
Gained as a Ph.D. Researcher | *Assistive Robotics Laboratory at* Virginia Tech

- Operated a project of assessing Human-In-the-Loop via control design technique ended up poster presentation at the 2016 IROS conference.
- Carried out system identification of wearables as demonstrated by developing the impedance controller in the poster.

HUBERT KIM

Research Scientist, Haptics

TECHNICAL SKILLS

Embedded Programming (C/C++ via CCStudio):
- UART/ I2C/ CAN
- Oscilloscopes/ logic analyzers

Data Acquisition and Simulation:
- MATLAB/LabVIEW

3D CAD:
- NX/SolidWorks

Statistics:
- JMP
- SPSS

Data Processing with NN:
- Python
- Tensorflow (Jupiter)

Physiological Sensors:
- EMG/IMU

HONORS

Doctoral Scholarship
ICTAS, Virginia Tech
Mar 2016 – July 2020

Best Mechanical Engineering Experience Award for Undergrad
NYU Tandon
May 2015

INTERESTS

Basketball

Weightlifting

Sci-Fi Novel

AREAS OF EXPERTISE continued

Signal Processing and Analysis
Gained as an Undergraduate Researcher | *Dynamic System Laboratory at* NYU

- Conducted the transfer function identification of the smart material to validate the physics-based model in the energy harvesting field.
- Configured custom and off-the-shelf data acquisition systems leading to several journal publications (1 first author, 4 authorships) and resulting in ICTAS funding (4+ years scholarship) for the doctoral study.
